Breed Descriptor of Dangi (Cattle)

Breeding Tract			
State: Gujarat	The Dangs		
State: Haryana	Rohtak		
	Karnal		
State: Maharashtra	Ahmadnagar		
	Nashik		
	Thane		
Location			
Longitude (deg.)	73.16 - 75.05		
Latitude (deg.)	18.02 - 20.52		
General Information			
Synonyms	Kandadi.		
Origin	In Marathi Dang means mountains and these animals are		
	living in mountai	ns. Hence these a	re called Dangi. Some
	believe that this o	originates from the	e Dangs district in
	Gujarat. The synonym name Kandadi suggests the origin		
	of the breed from Karnataka.		
Major utility	Work - Draught; Food - milk		
Comments on utility	Dangi cattle are extensively used for ploughing,		
	harrowing and other field operations, and also for carting		
	timber from forest area. The breed is well known for its		
	excellent working qualities in heavy rainfall areas, rice fields and hilly tracts.		
Comments on breeding	Mostly found in the Akola taluka of Ahmadnagar district,		
tract	Sinner and Igatpuri taluka of Nashik districts of		
	Maharashtra and Dangs district of Gujarat. It is also		
	found near by Thane district of Maharashtra. Generally these animals are found near the hilly tract where forest		
	is available in the ranges of Sahyadri.		
Adaptability to environment			infall conditions. The
	skin exudes an oily secretion which protects from heavy		
	rain.
