## **Breed Descriptor of Kachchhi-Sindhi (Horse)**

Navsari Kutchchh		
Jaisalmer		
Barmer		
68.7 - 72.52		
22.44 - 28.23		
Kachehhi, Sindhi		
This horse breed has its origin in Pachchham (Khavda)		
and Banni area of Bhuj Taluka of Kachchh district of		
Gujarat (India) and is locally known as Kachchhi Horse.		
The breeding tract is very close to the Sindh area on the		
border with Pakistan. Before partition both Kachchh and		
Sindh were considered the place of origin/ breeding tract		
of these horses. Hence these are named as		
Kachchhi-Sindhi. In Rajasthan, these are known as		
Sindhi horses.		
Transportation, riding, sports, safaris, bagghi, trading.		
Generally used for transportation of goods or other		
materials like fodder, raw construction materials, etc.		
Majority of the Kachchhi-Sindhi horse owner maintain		
and keep these horses for riding purpose, as these are		
excellent for long distance riding because of special type		
of Horse gait called Rewal Chal. Also used for horse		
safaris.		
This is a dry zone, rains are scanty. As a result,		
vegetation is also rare.Landscape is flat, soil is smooth in		
Banni and nearby greater and little Rann of Kutch while,		
sandy soil found in main land of Kachchh and Rajasthan.		
Excellent drought & heat tolerance capacity in arid &		
semi arid region. Excellent adaptability to both		
extensive and intensive housing system.

Feeding of adults			
Comments on Management	Kachchhi horse breeders follow specific feeding &		
	rearing practices, as the owners who are basically farmers		
	by occupation maintain horses in intensive system of		
	rearing but in the same area owners who are livestock		
	breeders/pastoralist by occupation maintain horses in		
	semi-intensive sy	stem. In Banni ar	rea most of horse
	owners are pastoralist and they follow extensive pattern of horse rearing & management. Open mating is practiced. Owners usually keep female horse and avoid keeping male/stallion. Stallions are very carefully		
	selected, keeping knowledge of their pedigree and		
	physical characters. In extensive system of rearing, challa		
	system is practiced to avoid unwanted breeding.		
Morphology			
Colour	Mainly bay		
Horn shape and size Visible characteristics	Haiana fasturas includa naman nasa annaman of fasa		
Visible characteristics	Unique features include roman nose appearance of face,		
	ears curved at tips but not touching each other, short		
	back, short pastern bone length, broader hoof for better grip and docile temperament.

Breeders consider Kachchhi-Sindhi horses as unique. Not only do they have distinct physical features but also quality of rewal chal, a special type of race. A rider can carry buttermilk (liquid) on the back of Kachchhi-Sindhi horse in open vessel to a long distance without any drop spilling out. Short pastern bone length & broader hoof, which is responsible for better grip & covering long distance during riding, and possibly saves from limb problems.
